What is AutoHotkey

AutoHotkey is a free, open-source scripting language for Windows that allows users to easily create small to complex scripts for all kinds of tasks such as: form fillers, auto-clicking, macros, etc.

LEARN MORE (<https://en.wikipedia.org/wiki/AutoHotkey>)
(<https://autohotkey.com>).

(</docs/AutoHotkey.htm>).

Is it good for me?

AutoHotkey has easy to learn built-in commands for beginners. Experienced developers will love this full-fledged scripting language for fast prototyping and small projects.

Why AutoHotkey

AutoHotkey gives you the freedom to automate any desktop task. It's small, fast and runs out-of-the-box. Best of all, it's free, open-source (GNU GPLv2), and beginner-friendly. Why not give it a try?

Return

A peek at the syntax...

AutoHotkey provides a simple, flexible syntax allowing you to focus more on the task at hand rather than every single little technicality. It supports not only the *popular* imperative-procedural paradigm, but also object-oriented and command-based programming.

Here are a few simple examples:

1. Hotstrings & Hotkeys
2. Clipboard example
3. Short GUI
4. Simple Array (or Objects)

code... (<http://www.rosettacode.org/wiki/Category:AutoHotkey>),

AutoHotkey sends several tools into retirement. It unites hotkey and text macros, and offers a scripting language which is more powerful than any batch file.

Wolfgang Reszel, c't Magazine
